

Short 6" Bonnet for Cryogenic Valves

Habonim has developed a new Cryogenic valve with a 6" bonnet to answer special market needs for installation in confined spaces. The new, short-bonnet valve includes all the unique safety features that characterize the Habonim cryogenic valve series.

Advantages / Features:

- One-piece, rigid 6" bonnet without welding
- Installation with the stem in the vertical upwards position or within 15° of vertical
- Anti-static, fire-safe design
- Short bolts result in minimum thermal expansion
- No trapped cavities
- Valve pad complies with ISO 5211
- The patented HermetiX™ stem packing is incorporated in non- fire-safe applications

The 6" bonnet can be ordered using the same description as the regular cryogenic valve, with the suffix "-6.0".

Example: C47C-6666PT/BW-6.0

Availability : In stock.
